Google Scholar Search Tips

Google Scholar can be an extremely useful resource for your research, but it is not a substitute for searching your academic journal databases, such as Science Direct, JSTOR, etc. Learn how to maximize the power of this tool but be aware of its limitations, too.
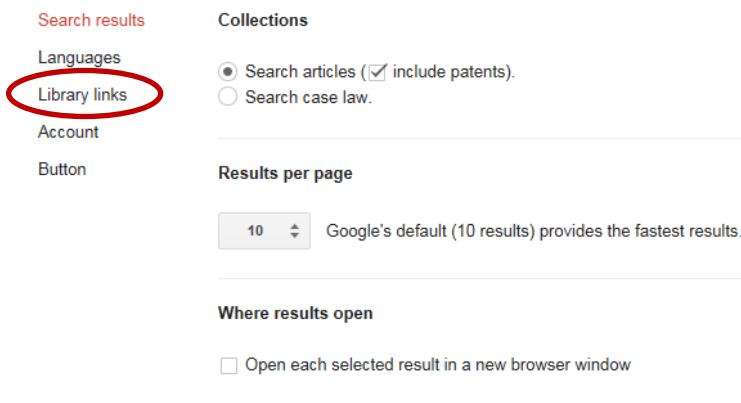

| Setting Preferences	Before searching Google Scholar, customize the **Library Links** setting in order to locate and link directly to articles that are available at Emory – on and off campus.
Click **Settings** on the Google Scholar home page.	My profile My library Alerts Metrics Advanced search Settings
Two important links on this page: - **Library Links** - **Bibliography Manager**	Search results — Collections — Search articles (☑ include patents). Search case law. Languages Library links Account Button Results per page — 10 — Google's default (10 results) provides the fastest results. Where results open — ☐ Open each selected result in a new browser window See Bibliography Manager options Bibliography manager — ○ Don't show any citation import links. ● Show links to import citations into EndNote.

In **Library Links**, if the **Find it @ Emory** check box does not appear, search Emory and check and save this option.	Search results Languages Library links Account Button **Show library access links for (choose up to five libraries):** _e.g., Harvard_ ☑ Open WorldCat - Library Search ☑ Find it @ Emory - Find it @ Emory
Now you will automatically be alerted to the right of returned articles when that title is available via Emory Libraries' databases.	Competing in the age of omnichannel retailing E Brynjolfsson, YJ Hu... - MIT Sloan Management ..., 2013 - search.proquest.com ... **Mobile** technology is well on its way to changing **consumer behavior** and expectations. ... As John Donahoe, CEO of eBay, has observed: **Mobile** is bringing the Internet to you seven days a week, 24 hours a day, on your time, at your ... Similarly, **apps** from retailers such as Wal-Mart, ... Cited by 90 Related articles All 3 versions Web of Science: 12 Cite Save More [HTML] from mit.edu Find it @ Emory **Web of Science**-links you to Cited By page within WoS; more authoritative option than GS's "Cited by" link **Cite**-Copy/paste formatted citation (APA, Chicago, etc. or import into a bibliography manager (EndNote, etc.) **Save** – must be logged into Gmail account

Advanced Searching & Alerts	Gather more precise results and set up custom alerts delivered directly to your email. Create alerts based on keywords, authors, specific journal articles/table of contents, citing articles, etc.
Click **Advanced Search** on Google Scholar's home page.	☰ **Google** Scholar 🎓 My profile ★ My library ✉ Alerts ▣ Metrics Q⁺ Advanced search ⚙ Settings

Use the **Advanced Search template** to filter your searches by keywords, author, publication, title, and date.

Advanced search

Find articles

with **all** of the words

with the **exact phrase**

with **at least one** of the words

without the words

where my words occur
- ● anywhere in the article
- ○ in the title of the article

Return articles **authored** by

e.g., *"PJ Hayes"* or *McCarthy*

Return articles **published** in

e.g., *J Biol Chem* or *Nature*

Return articles **dated** between ⬚ — ⬚

e.g., *1996*

Creating Alerts for Keyword Searches:

- Click **Create Alert** in the left hand menu of the search results page **OR**
- Click **Alerts** on Google Scholar's home page, then enter your search keywords and email address.

Learn More About Creating Google Scholar Citations: http://scholar.google.com/intl/ en/scholar/citations.html	Google Scholar Citations provide a simple way for authors to keep track of citations to their articles. You can check who is citing your publications, graph citations over time, and compute several citation metrics. You can also make your profile public, so that it may appear in Google Scholar results when people search for your name, e.g., richard feynman. It's quick to set up and simple to maintain. You can add groups of related articles, not just one article at a time, and your citation metrics are computed and updated automatically as Google Scholar finds new citations to your work on the web. You can choose to have your list of articles updated automatically or review the updates yourself. *Be aware of disadvantages using Google Scholar for your citation analysis. Google Scholar is not a pure repository of peer-reviewed journal articles and cites; it contains a lot of content that would not be considered authoritative for tenure promotion analysis.*
